

## U1

Originally, the U1 was intended as a sturdy, old-fashioned shipyard radio, but it has since grown into a waterproof jack-of-all-trades with numerous possibilities. It comes complete with a microphone input, battery compartment, 12-volts connection (cigarette lighter), socket for headphones, LED lighting... All of this wrapped up in an unusually powerful tuner and speaker with a beautiful bass sound reproduction. This technical tour de force with its sturdy design can stand up to rough treatment. It will never leave you out in the cold, but this doesn't mean you can't do this with the U1! You can use this radio in the garden, poolside, in the middle of a home renovation, at the campground...

model	U1
radio	AM/FM 2-band radio
frequencies	FM: 87.50 - 108 MHz AM: 520-1710 KHz
cabinet	shock-proof PVC
